Frances Donald is the Global Chief Economist and Global Head of Macroeconomic Strategy, Multi-Asset Solutions Team, John Hancock Investment Management and Manulife Investment.

Frances forecasts global macroeconomic and financial trends, analyzes the economy and capital markets for potential opportunities and risks, and serves as a thought leader both within the firm and externally. As a senior member of the firm's multi-asset solutions team, she coordinates global macro research, assists in the team's return forecasting process, and contributes to portfolio positioning views.

Prior to joining Manulife, Frances worked as a financial economist for Scotiabank in Toronto, and before that as a global macro analyst for Pavilion Global Markets in Montreal. Earlier in her career, she held various positions at Deloitte, Roubini Global Economics, and Bank of Canada. Frances is a frequent public speaker and regularly appears in international media, including Bloomberg and CNBC.
